

MEMO: To all Bryston Customers
SUBJECT: Hi-Fi & Records Reviews Bryston 28B²'s

September 2010

Hi Folks,

I was just informed that we have a terrific review in the August issue of a German magazine – **Hi-Fi & Records** on the **Bryston 28B SST² amplifier**.

Conclusion in English:

“Bryston breaks all performance-records with their 28B-SST2 amplifier statement. These are the appropriate amps for both the sophisticated listeners as well for those who like it thunderous.

And now that the Canadians are not only manufacturing their professional electronics, which are timelessly elegant and valuable, makes it just perfect ...amazing amps.**”**

James Tanner,
Bryston
